

MATHEUS PHILLIPE LULA SOUZA

**Full-Stack Developer | Frontend & Mobile | React • TypeScript • Flutter | FastAPI • APIs
| AI & Automation**

Parnaíba - PI, Brazil | Available for Remote Work

Phone: +55 86 98145-1876

E-mail: matheusphillip170@gmail.com

Linkedin: <https://www.linkedin.com/in/matheusconaga>

Portfolio: <https://portfoliomatheuslula.onrender.com>

Stack Summary: React • TypeScript • Flutter • FastAPI • Node.js • Docker • RESTful APIs • Microservices • JWT Authentication • Firebase • PostgreSQL • CI/CD • Cloud Deployment • AI Integration.

Professional Objective

Full-Stack Developer focused on React, TypeScript, Flutter, and FastAPI. Experienced in developing scalable web and mobile applications, REST APIs, distributed systems, and AI-driven workflow automations using modern architecture and cloud integrations.

Key Achievements

- +30% user engagement on an educational platform (ENEM Project).
- Improved user performance from a 50% to 80% success rate.
- Up to a 40% reduction in manual tasks through custom automations (n8n + AI).
- 20-30% increase in operational efficiency via tailored AI integrations.

Featured Projects

- **Asset Management System.** SPA web application built with React.js using a serverless architecture with Firebase and Cloudinary. Focused on asset management, featuring an administrative dashboard, QR code generation and scanning, authentication, and cloud service integration.
https://github.com/matheusconaga/projeto_patrimoniarior
- **Mobile Social Network.** Mobile application developed with Flutter and a FastAPI backend, featuring a publication feed, JWT authentication, REST API integration, and reactive state management (MobX).
<https://github.com/matheusconaga/projeto-println>

Professional Summary

Full-Stack Developer with over 2 years of experience in developing scalable, high-performance web and mobile applications.

Experienced in modern system architecture (RESTful APIs, microservices, and serverless), focusing on performance, scalability, and user experience.

Proven track record of developing secure APIs with authentication and authorization (JWT), integrating external and cloud services, and building responsive user interfaces with React and Flutter.

Skilled in process automation and Artificial Intelligence (LLM) integration, optimizing operational pipelines and reducing manual overhead.

Technical Skills

Frontend: React.js • TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • Vite • SPA • Responsive Design • Mobile-first.

Mobile: Flutter • React Native • Dart • Cross-platform development • Mobile UI/UX. UI/UX & Styling: Tailwind CSS • Styled Components • Material UI • Figma • Design Systems • Component-Based Architecture.

Backend & APIs: FastAPI • Python • Node.js • REST APIs • JWT Authentication • Authorization • Middleware • API Design • Firebase Auth • Supabase.

Databases: PostgreSQL • MySQL • MongoDB • Firebase Firestore.

DevOps & Cloud: **Docker** • Docker Compose • CI/CD (GitHub Actions) • Firebase • Supabase • Vercel • Render • Cloudinary • Deploy Automation.

Automation & AI: n8n • LLMs (OpenAI integrations) • Workflow Automation • AI APIs • Process Automation.

Tools & Methodologies: Git • GitHub • Agile (Scrum, Kanban) • Clean Code • SOLID • MVC • MVVM • System Design (basic) • Scalable Applications • Performance Optimization.

Professional Experience

RGM Tecnologia - Full-Stack Developer / Frontend / Mobile

Aug 2024 - Present | Parnaíba - PI, Brazil

- Reduced manual operations by 20-30% by designing workflow automations using n8n integrated with AI (LLMs).
- Enhanced system scalability and codebase organization by transitioning structuring toward a service-oriented architecture (microservices).
- Developed and integrated REST APIs using FastAPI and Node.js, ensuring high-throughput communication between services.
- Built and maintained mobile applications using Flutter and React Native, securing high performance and responsiveness in production environments.
- Integrated multiple services (external APIs and proprietary backends), optimizing internal operations and increasing cross-team efficiency.
- Implemented secure authentication layers using JWT (Bearer Tokens), upgrading overall system security and access control.
- Built interactive dashboards and internal tooling with React, improving data visualization and data-driven decision-making.
- Managed complex application states using Redux, Zustand, and Context API, boosting code predictability and ease of maintenance.
- Contributed to architectural decisions and code standardization, applying best practices like Clean Code and SOLID principles.

Centro Espírita Caridade e Fé - Frontend / Full-Stack Developer (Freelance)
Oct 2025 - Dec 2025 | Brazil

- Cut manual administrative overhead by approximately 40% through automated Excel data import/export pipelines.
- Built a complete web-based asset management application using React, drastically improving asset tracking and organization.
- Developed an administrative dashboard from scratch, increasing asset inventory visibility and traceability.
- Integrated a QR Code scanning and tracking system, streamlining physical item identification.
- Programmed full CRUD capabilities tied to secure REST APIs, ensuring dependable database management.
- Adopted a unified Design System and component-based architecture, upgrading visual consistency and system maintainability.
- Secured seamless data communication across the frontend, internal APIs, and external cloud services.

Educational Platform for ENEM Prep - Frontend / Mobile Developer (Freelance)
Mar 2023 - Aug 2024 | Brazil

- Increased active user engagement by roughly 30% by implementing a gamified Q&A system.
- Boosted overall student performance from a 50% average to an 80% success rate through interactive feature rollouts and real-time educational feedback.
- Developed a user-centric educational mobile application using Flutter, prioritizing smooth UX and long-term user retention.
- Engineered core platform mechanics, including leaderboards, individual progress tracking, and performance analytics.

Education

- Technology Degree in Systems Analysis and Development - IFPI (2025)
- Technical Degree in Business Administration - IFMA (2021)

Certifications

- Automation with n8n and AI Agents - Udemy (2026)
- Artificial Intelligence: From Zero to Advanced - Udemy (2026)
- User Experience (UX) - FIAP (2025)
- JavaScript and TypeScript - Udemy (2025)
- React Native - Udemy (2024)
- Flutter - Udemy (2024)

Languages

- English: Professional Working Proficiency (Technical reading and writing)
- Portuguese: Native speaker
