Professional Summary

Full Stack Developer with experience in developing web and mobile applications using React, TypeScript, Flutter, and FastAPI. Experienced in building management systems, process automations, and service integrations, participating from interface development to REST APIs, databases, and application deployment. Proven track record in developing solutions focused on productivity, automation, and user experience, with a strong focus on code quality, collaboration, and continuous delivery.

Core Technologies

React • TypeScript • FastAPI • Flutter • Python • Node.js • PostgreSQL • Docker • Git

Professional Experience

RGM Tecnologia - Fullstack / Mobile Developer

Aug 2024 - Present | Parnaíba - PI, Brazil

- Developed process automations using n8n and AI model integrations, reducing repetitive operational activities by up to 30%.
- Developed and maintained web and mobile applications using React, Flutter, and FastAPI, handling bug fixes, feature evolution, and new version deployments.
- Developed REST APIs using FastAPI and Node.js for integration between internal systems, external services, and applications.
- Implemented JWT authentication and administrative dashboards for internal operations control.
- Participated in code standardization using Clean Code, SOLID, and layered architecture principles, facilitating application maintenance and scalability.

Centro Espírita Caridade e Fé - Fullstack Freelancer

Oct 2025 - Dec 2025

- Reduced operational rework by up to 40% through asset management process automation.
- Developed an asset tracking system using QR Codes to streamline asset identification and control.
- Developed an administrative dashboard for asset monitoring and management.
- Implemented data import and export pipelines with external service integration.
- Structured reusable components and a Design System for interface standardization and increased development productivity.

ENEM Study Platform - Mobile / Frontend Developer Freelancer

Mar 2023 - Aug 2024 | Brazil

- Developed a mobile application in Flutter for ENEM exam preparation, contributing to an approximate 30% increase in user engagement.
- Improved the educational performance rate from 50% to 80% via UX optimization and learning flow enhancements.
- Implemented a ranking system, progress tracking, and real-time feedback.
- Redesigned the application's navigation flow to enhance user experience and facilitate student progress tracking.

Technical Skills

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Styled Components, Vite, React Hooks, Context API, REST API Consumption.

Mobile: Flutter, React Native, Dart.

Backend & APIs: FastAPI, Node.js, Python, REST APIs, JWT, Swagger/OpenAPI.

Database: PostgreSQL, MySQL, MongoDB, SQL, Relational Modeling.

DevOps & Cloud: Docker, Docker Compose, GitHub Actions, CI/CD, Firebase, Render, Vercel.

Automation & AI: n8n, LLMs, AI Integration, Process Automation.

Tools: Git, GitHub, Figma.

Methodologies: Scrum, Kanban, Clean Code, SOLID.

Featured Projects

DocFlow AI | Intelligent Document Processing

- An intelligent document processing platform using AI, enabling extraction, indexing, and contextual information retrieval from PDFs, images, and DOCX files.
- Implemented an OCR pipeline, document processing, and semantic retrieval using RAG architecture.
- Developed a FastAPI backend for asynchronous processing and integration with PostgreSQL and pgvector.
- Containerized the application with Docker and automated deployment using GitHub Actions.

Stack: FastAPI, Python, PostgreSQL, pgvector, Docker, GitHub Actions, Gemini AI.

GitHub: <https://github.com/matheusconaga/docflow-ai>

Patrimoniário | Asset Management System

- An asset control system featuring asset registration, QR Code tracking, administrative dashboards, and report generation.
- Developed a React interface using reusable components and a custom Design System.
- Implemented spreadsheet importing, image management, and integration with Firebase and Cloudinary.
- Structured the application for scalability using a decoupled architecture between frontend and services.

Stack: React, TypeScript, Firebase, Cloudinary, Styled Components.

GitHub: https://github.com/matheusconaga/projeto_patrimoniario

PrintLn | Mobile Social Network

- A mobile application developed in Flutter featuring user authentication, image publishing, comments, and a real-time feed.
- Integrated the app with a custom API using FastAPI and JWT authentication.
- Implemented state management with MobX and consumed REST APIs.

- Utilized native features such as camera and geolocation for content creation.
- Stack: Flutter, Dart, FastAPI, PostgreSQL, MobX, JWT.
- GitHub: <https://github.com/matheusconaga/projeto-println>

Education

- **Higher Education - Technologist in Systems Analysis and Development**
Federal Institute of Piauí (IFPI)
Graduated: 2025
- **Technical Degree in Business Administration**
Federal Institute of Maranhão (IFMA)
Graduated: 2021

Certifications

- Automation with N8N and AI Agents - Udemy (2026).
- Artificial Intelligence Training: From Zero to Advanced - Udemy (2026).
- User Experience - FIAP (2025).
- JavaScript and TypeScript - Udemy (2025).
- React Native - Udemy (2024).
- Flutter - Udemy (2024).

Languages

- English: Professional Working Proficiency (Technical reading and writing)
- Portuguese: Native speaker
