PROFESSIONAL SUMMARY

Full Stack Developer with over 2 years of experience in the development, maintenance, and evolution of web applications and APIs. Experienced with Python, FastAPI, PostgreSQL, REST API development, service integration, and JWT authentication, alongside React, TypeScript, and Node.js. Background in document processing, Artificial Intelligence integrations, RAG, Docker, CI/CD, and automated testing. Also experienced in process automation using n8n and AI, helping to reduce time spent on repetitive operational activities by approximately 30%. Focused on code quality, problem-solving, and building reliable solutions.

TECHNICAL SKILLS

Backend & APIs: Python, FastAPI, Node.js, Express.js, REST APIs, JWT authentication, service integration, and Swagger/OpenAPI.

Databases: PostgreSQL, MySQL, MongoDB, SQL, Firebase, Prisma, SQLAlchemy, and data modeling.

Frontend & Web Development: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite, Tailwind CSS, and Styled Components.

DevOps & Version Control: Git, GitHub, Docker, Docker Compose, GitHub Actions, Jenkins, and CI/CD.

Testing & Software Quality: Pytest, Jest, React Testing Library, unit and integration testing, Clean Code, and SOLID.

Artificial Intelligence & Automation: Integration with AI APIs and models, LLMs, RAG, semantic search, pgvector, OCR, and n8n.

Methodologies & Fundamentals: Scrum, Kanban, agile methodologies, OOP, programming logic, problem-solving, and team collaboration.

Complementary Technologies: Flutter, Dart, React Native, and Java.

PROFESSIONAL EXPERIENCE

Full-Stack / Mobile Developer — *RGM Tecnologia* · · Aug 2024 – Aug 2026 | Parnaíba, PI, Brazil

- Developed and maintained web applications in production using Python/FastAPI, Node.js, React, and TypeScript, implementing features, bug fixes, and improvements.
- Developed and integrated REST APIs using PostgreSQL and JWT authentication for communication between applications and external services.
- Implemented automated tests and CI/CD pipelines with GitHub Actions and Jenkins, contributing to application reliability and maintainability.
- Developed automations with n8n and integrations with Artificial Intelligence models, reducing time spent on repetitive operational tasks by approximately 30%.

Full-Stack Developer (Freelancer) — *Centro Espírita Caridade e Fé* · Oct 2025 – Dec 2025

- Developed an asset management system with React and TypeScript, including registration, asset tracking via QR Code, and an administrative dashboard.
- Implemented reusable components, data import and export, and functionalities to digitize asset controls, helping to reduce operational rework by approximately 40%.

PRODUCTS & RELEVANT PROJECTS

DocFlow AI — Intelligent Educational Document Processing — github.com/matheusconaga/docflow-ai

- Developed an API using Python and FastAPI for processing, extracting, and structuring educational documents.
- Implemented a processing pipeline with OCR, generative AI integration, semantic document splitting, and embedding generation.
- Developed RAG functionalities and vector similarity search using PostgreSQL and pgvector.

Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, pgvector, Gemini AI, Docker, and GitHub Actions.

EducAssist — Intelligent Assistant for Teachers — educassist.com.br

- Developing an Artificial Intelligence application to support teachers in creating and adapting lesson plans, activities, and assessments.
- Working on product architecture and evolution, integrating frontend, backend, database, and AI services during MVP development and validation.

Stack: Python, FastAPI, React, TypeScript, PostgreSQL, and LLMs.

Portfolio Analytics — Fullstack Web Analytics Platform — github.com/matheusconaga/portfolio-analytics

- Developed a platform for monitoring visitors, sessions, events, and interactions, featuring a React/TypeScript frontend and a Node.js/Express REST API.
- Implemented data persistence with PostgreSQL and Prisma, containerization with Docker, and Webhook integrations with n8n and Telegram to automate notifications and summaries.

Stack: Node.js, Express.js, React, TypeScript, PostgreSQL, Prisma, Docker, n8n, and Webhooks.

EDUCATION

Technology Degree in Systems Analysis and Development — Federal Institute of Piauí (IFPI) · 2025

Technical Degree in Business Administration — Federal Institute of Maranhão (IFMA) · 2021

CERTIFICATIONS

Automation with n8n and Artificial Intelligence Agents — Udemy, 2026 • Artificial Intelligence: From Beginner to Advanced — Udemy, 2026 • User Experience — FIAP, 2025 • JavaScript and TypeScript — Udemy, 2025 • React Native — Udemy, 2024 • Flutter — Udemy, 2024
